

## Fiber System Solutions - Fiber

# Unloaded Patch Panel 19", F.O. 24x SC Duplex/LQC Quad, 1U, Black

### Overview

Patch Panel 19" sliding for Fiber Optic, empty, with mounting possibility up to 24 adapters. (Double SC, LC quad, Single mode or Multimode). Equipped with system for organizing and cable routing.

### TECNICAL DATA

#### Dimensions

Width – 483mm

Depth – 200mm

Height – 1U (445mm)

#### Weight

2.8kg (fully loaded)

#### Features

Sliding tray for easy access;

The rear panel offers a number of openings to accommodate various cable routing settings (4 x 10 + 2mm x 20mm);

Numbered front panel for easy identification of each port.

#### Application

The fiber optic panel is a solution that offers a high versatility and flexibility for mergers and optical connections.

The shallow depth of the panels allows installation into most wall racks and floor.

#### Note

The panel is provided without adapters.

The customer has the possibility to adapt it according to their needs.

The optical fiber distribution frame is prepared to receive the following adapters:

SC Adapters Double;

LC Adapters Quadruple.
